

The Uber of Remittances

Executive Summary

Independent **remittance companies** have difficulty accessing **payment rails** and **settlement services**

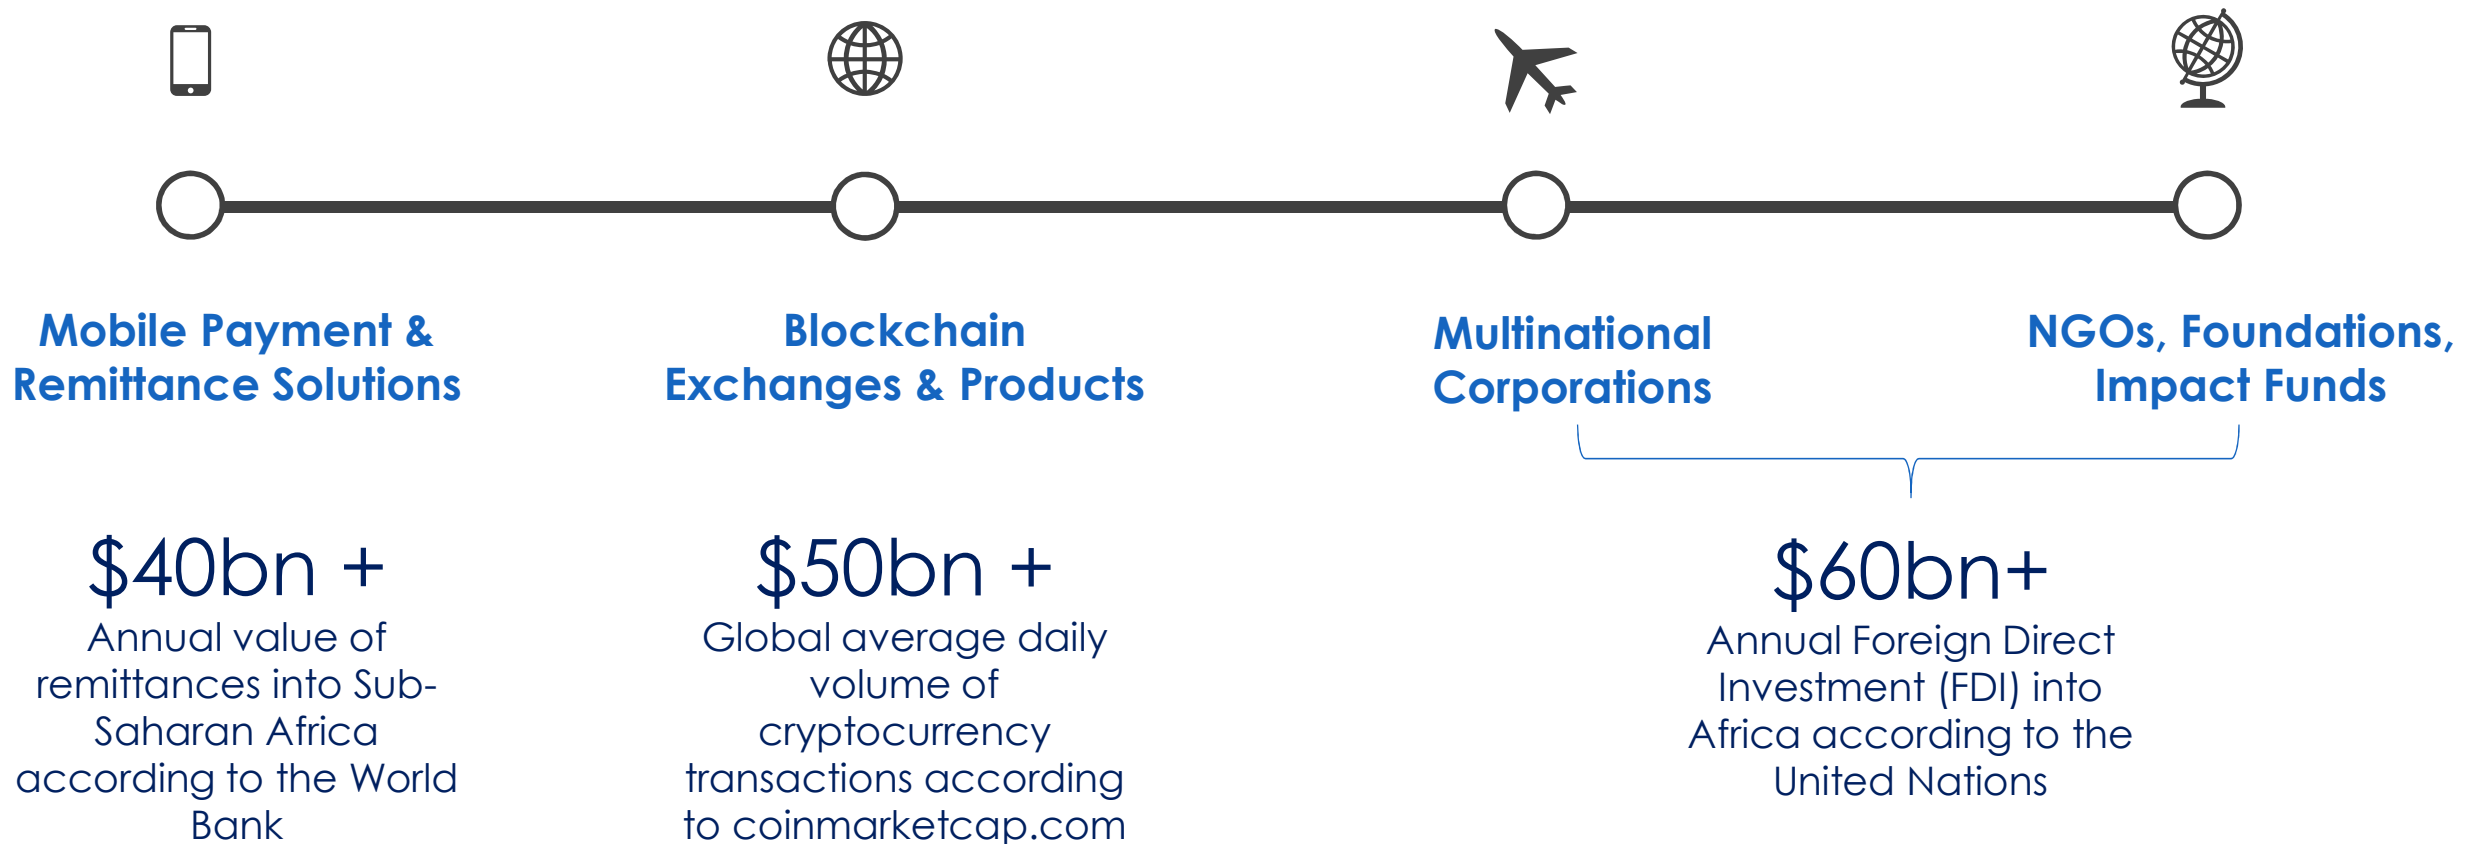

Banks and Aggregators snub them

Companies lack the ability to comply with KYC/AML regulations

Western union and Moneygram charge expensive fees for independents to access their APIs

Very few independents can access the unbanked due to limited reach of partners

RocRemit focuses on **building solutions** in global industry verticals that originate **large transaction volumes**

We support the needs of any **remittance company** or **organization** looking to move value quickly and inexpensively

Platform Integration

We help you launch as an anchor on the Stellar network so you can transact with us

- Our team will integrate you into our “anchor as a service platform”

Transmission and Settlement

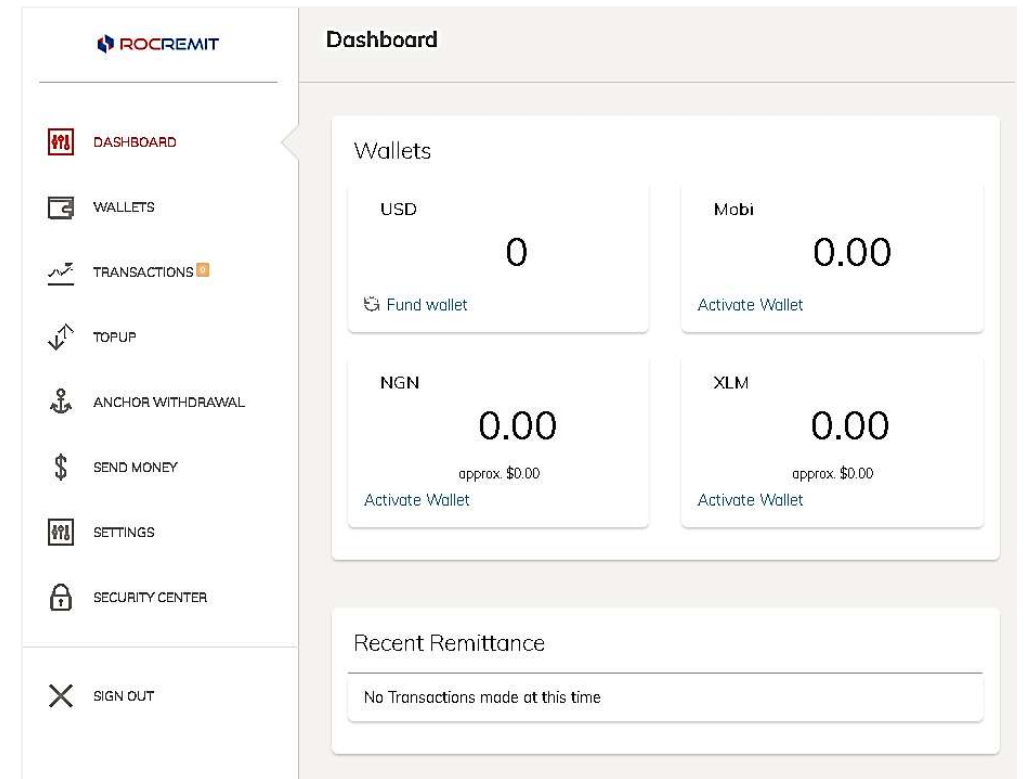

We leverage the power of the Stellar network to:

- Conduct KYC/AML checks
- Tokenize your deposited funds
- Execute your transactions leveraging our distribution partners
- Settle you accounts in real time

RocRemit has a **track record** of developing Blockchain solutions that solve real problems

Award-winning Blockchain invoicing and payments tool

Blockchain wallet and transactions platform
